

(continued from outside back cover)

Solar photoelectrocatalytic degradation of Acid Orange 7 azo dye using a highly stable TiO ₂ photoanode synthesized by atmospheric plasma spray S. García-Segura, S. Dosta, J.M. Guilemany and E. Brillas (Spain)	142
The reduction of NO by CO under oxygen-rich conditions in a fixed-bed catalytic reactor: A mathematical model that can explain the peculiar behavior A.G. Makeev and N.V. Peskov (Russia)	151
Enhancement of pesticide photo-Fenton oxidation at high salinities M.M. Micó, J. Bacardit, J. Malfeito and C. Sans (Spain)	162
Glycerol conversion to acrylonitrile by consecutive dehydration over WO ₃ /TiO ₂ and ammoxidation over Sb-(Fe,V)-O C. Liebig, S. Paul, B. Katryniok, C. Guillon, J.-L. Couturier, J.-L. Dubois, F. Dumeignil and W.F. Hoelderich (France, Germany)	170
Core-shell Pt modified Pd/C as an active and durable electrocatalyst for the oxygen reduction reaction in PEMFCs G. Zhang, Z.-G. Shao, W. Lu, F. Xie, H. Xiao, X. Qin and B. Yi (PR China)	183
Reaction kinetics investigation of the selective oxidation of aqueous ethanol solutions with air over a Au/TiO ₂ catalyst P. Aghaei and R.J. Berger (Germany, The Netherlands)	195
Co ₃ O ₄ nanoparticles assembled coatings synthesized by different techniques for photo-degradation of methylene blue dye T. Warang, N. Patel, R. Fernandes, N. Bazzanella and A. Miotello (Italy)	204
Effect of water vapor on the by-products and decomposition rate of ppb-level toluene by photocatalytic oxidation J. Mo, Y. Zhang and Q. Xu (PR China)	212
A salt-assisted approach for the pore-size-tailoring of the ionic-liquid-templated TiO ₂ photocatalysts exhibiting high activity S.-m. Chang and C.-y. Lee (Taiwan)	219
Cornered silver and silver—platinum nanodisks: Preparation and promising activity for alkaline oxygen reduction catalysis C.-L. Lee, C.-M. Syu, C.-H. Huang, H.-P. Chiou, Y.-J. Chao and C.-C. Yang (Taiwan)	229
Nanostructure catalysts prepared by multi-sputtering deposition process for enhanced methanol electrooxidation reaction K.-W. Park, Y.-W. Lee and Y.-E. Sung (Republic of Korea)	237
Catalytic removal of formaldehyde at room temperature over supported gold catalysts B.-B. Chen, C. Shi, M. Crocker, Y. Wang and A.-M. Zhu (People's Republic of China, USA)	245
Comparison of different precious metals in activated carbon-supported catalysts for the gas-phase hydrodechlorination of chloromethanes M. Martín-Martínez, L.M. Gómez-Sainero, M.A. Álvarez-Montero, J. Bedia and J.J. Rodríguez (Spain)	256
Mechanistic investigations of the promoting role of Rh on the NSR performance of NO _x storage BaO-based catalysts S. Andonova, V. Marchionni, M. Borelli, R. Nedyalkova, L. Lietti and L. Olsson (Sweden, Italy)	266
Understanding the impact of aluminum oxide binder on Ni/HZSM-5 for phenol hydrodeoxygenation C. Zhao, Y. Yu, A. Jentys and J.A. Lercher (Germany)	282
Lean NO _x reduction on LNT-SCR dual-layer catalysts by H ₂ and CO Y. Liu, Y. Zheng, M.P. Harold and D. Luss (USA)	293
Bismuth vanadate hollow spheres: Bubble template synthesis and enhanced photocatalytic properties for photodegradation J. Sun, G. Chen, J. Wu, H. Dong and G. Xiong (PR China)	304
Water splitting from dye wastewater: A case study of BiOCl/copper(II) phthalocyanine composite photocatalyst L. Zhang, W. Wang, S. Sun, Y. Sun, E. Gao and J. Xu (PR China)	315
Reactive adsorption of hydrogen sulfide on visible light photoactive zinc (hydr)oxide/graphite oxide and zinc (hydr)oxychloride/graphite oxide composites O. Mabayoje, M. Seredych and T.J. Bandoz (USA)	321
A novel BiOCl thin film prepared by electrochemical method and its application in photocatalysis X. Zhang, X. Liu, C. Fan, Y. Wang, Y. Wang and Z. Liang (PR China)	332
Catalytic wet air oxidation of bisphenol A model solution in a trickle-bed reactor over titanate nanotube-based catalysts B. Erjavec, R. Kaplan, P. Djinić and A. Pintar (Slovenia)	342
The improved reactivity of manganese catalysts by Ag in catalytic oxidation of toluene Z. Qu, Y. Bu, Y. Qin, Y. Wang and Q. Fu (China)	353
Synthesis and catalysis of copper sulfide/carbon nanodots for oxygen reduction in direct methanol fuel cells Z.-Y. Shih, A.P. Periasamy, P.-C. Hsu and H.-T. Chang (Taiwan)	363
Performance of layered birnessite-type manganese oxide in the thermal-catalytic degradation of polyamide 6 E. Eren, M. Güney, B. Eren and H. Gumus (Turkey)	370
Nitrogen-doped reduced graphene oxide supports for noble metal catalysts with greatly enhanced activity and stability D. He, Y. Jiang, H. Lv, M. Pan and S. Mu (China)	379
A search for alternative Deacon catalysts M. Hammes, M. Valtchev, M.B. Roth, K. Stöwe and W.F. Maier (Germany)	389
Heterogeneous catalytic reaction of elemental mercury vapor over cupric chloride for mercury emissions control X. Li, Z. Liu, J. Kim and J.-Y. Lee (USA)	401
Heterogeneous photo-enhanced conversion of carbon dioxide to formic acid with copper- and gallium-doped titania nanocomposites P.L. Richardson, M.L.N. Perdigoto, W. Wang and R.J.G. Lopes (USA, Portugal)	408
Halloysite-TiO ₂ nanocomposites: Synthesis, characterization and photocatalytic activity D. Papoulis, S. Komarneni, D. Panagiotaras, E. Stathatos, D. Toli, K.C. Christoforidis, M. Fernández-García, H. Li, S. Yin, T. Sato and H. Katsuki (Greece, USA, Spain, Japan)	416

Tungsten as an interface agent leading to highly active and stable copper-ceria water gas shift catalyst A. Kubacka, R. Si, P. Michorczyk, A. Martínez-Arias, W. Xu, J.C. Hanson, J.A. Rodriguez and M. Fernández-García (Spain, USA, Poland)	423
Ni/Al-Mg-O solids modified with Co or Cu for the catalytic steam reforming of bio-oil J. Remón, J.A. Medrano, F. Bimbela, L. García and J. Arauzo (Spain)	433
A novel twin reactor for CO ₂ photoreduction to mimic artificial photosynthesis W.-H. Lee, C.-H. Liao, M.-F. Tsai, C.-W. Huang and J.C.S. Wu (Taiwan)	445
One-step synthesis of easy-recycling TiO ₂ -rGO nanocomposite photocatalysts with enhanced photocatalytic activity P. Wang, J. Wang, X. Wang, H. Yu, J. Yu, M. Lei and Y. Wang (PR China)	452
Photocatalytic activity of N-doped and N-F co-doped TiO ₂ and reduction of chromium(VI) in aqueous solution: An EPR study A.E. Giannakas, E. Seristatidou, Y. Deligiannakis and I. Konstantinou (Greece)	460
Decomposition of methane over unsupported porous nickel and alloy catalyst A.C. Lua and H.Y. Wang (Republic of Singapore)	469
Catalytic coating synthesized onto cordierite monolith walls. Its application to diesel soot combustion E.D. Banús, V.G. Milt, E.E. Miró and M.A. Ulla (Argentina)	479
Efficient persistent photocatalytic decomposition of nitrogen monoxide over a fluorescence-assisted CaAl ₂ O ₄ :(Eu, Nd)/(Ta, N)-codoped TiO ₂ /Fe ₂ O ₃ H. Li, S. Yin, Y. Wang and T. Sato (Japan, PR China)	487
Transformation of dibenzothiophenes model molecules over CoMoP/Al ₂ O ₃ catalyst in the presence of oxygenated compounds M. Philippe, F. Richard, D. Hudebine and S. Brunet (France)	493
Effect of Ce/Zr ratio in CeZr-CoRh catalysts on the hydrogen production by glycerol steam reforming L.M. Martínez T, M. Araque, J.C. Vargas and A.C. Roger (France, Colombia)	499
Activity controlling factors for low-temperature oxidation of CO over supported Pd catalysts A. Satsuma, K. Osaki, M. Yanagihara, J. Ohyama and K. Shimizu (Japan)	511
Optimization of imazalil removal in the system UV/TiO ₂ /K ₂ S ₂ O ₈ using a response surface methodology (RSM) R. Hazime, Q.H. Nguyen, C. Ferronato, T.K.X. Huynh, F. Jaber and J.-M. Chovelon (France, Vietnam, Liban)	519
Carbon-NSR catalyst interaction: Impact on catalyst structure and NO _x storage efficiency J. Klein, D. Wu, V. Tschamber, I. Fechet and F. Garin (France)	527
Photoelectrocatalytic selective oxidation of 4-methoxybenzyl alcohol in water by TiO ₂ supported on titanium anodes L. Özcan, S. Yurdakal, V. Augugliaro, V. Loddo, S. Palmas, G. Palmisano and L. Palmisano (Turkey, Italy)	535
On the kinetics of photoelectrocatalytic water splitting on nanocrystalline TiO ₂ films A.K. Seferlis and S.G. Neophytides (Greece)	543
